

Maternal-Newborn Nursing Care

“Mother-Baby”

NUR 2200

Maternal-Newborn Care

This course introduces nursing concepts related to the delivery of nursing care for the expanded family. Emphasis is placed on utilizing the nursing process as a framework for managing/providing nursing care to individuals and families along the wellness-illness continuum. Upon completion, students should be able to utilize the nursing process to deliver nursing care to mothers, infants, children, and families. In addition, this course will include content related to adult/children experiencing medical/surgical alterations. This course has more than 1000 InterActive Questions and Answers with Rationales to increase student's performance in the Board Exams and mastering the subject matter

Optional Textbooks

1. Maternal & Child Nursing Care, 2e Marcia L. London, Patricia A. Ladewig, and Jane W. Ball,; New Jersey; Prentice Hall 2007
